

RIIMPO318F Conduct Civil Construction Skid Steer Loader Operations

This program has been designed for those people wanting to develop the operator skills and underpinning knowledge required to operate modern skid steer loader equipment. The program provides both novice and experienced operators with a comprehensive training package that covers all facets of skid steer loader operations.

The program ensures that students receive professional training that promotes individual skill and knowledge development whilst at the controls of late model skid steer loaders.

If you are looking to achieve a training standard of excellence in preparation for an exciting future career in civil construction or are looking to further your existing skills in skid steer loader operations.

Contact our office today:
