

## RIIMPO320F Conduct Civil Construction Excavator Operations

This program has been designed for those people wanting to develop the operator skills and underpinning knowledge required to operate heavy tracked excavator equipment. The program provides both novice and experienced operators with a comprehensive training package that covers all facets of excavator operations.

The program ensures that students receive professional training that promotes individual skill and knowledge development whilst at the controls of a variety of medium and large tracked excavator equipment ranging from 15 to 30 tonnes.

If you are looking to achieve a training standard of excellence in preparation for an exciting future career in civil construction or are looking to further develop your existing skills in heavy excavation plant operation. Contact our office today.

Course modules:

- **Excavator pre and post operational checks**
- **Hazard identification and risk controls**
- **Machine routine maintenance**
- **Operate excavator**
- **Identifying soil types**
- **Trenching techniques**
- **Bulk load movement**
- **Backfilling techniques**

Pre requisites: An understanding of written and spoken English.

On completion of this course participants will be eligible for a national photo competency card and statement of attainment.

### Delivery

- **On the job training** – our trainers come to your workplace to deliver theory and conduct practical skills training and assessments.
- **Live training facility** – courses run at one of our unique training facilities, giving students the opportunity to get hands-on experience in a real working environment.

### Fees and charges
