

# Conduct Civil Site Dumper Operations Operator Competency Card

This program has been designed for those people wanting to develop the operator skills and underpinning knowledge required to safely operate forward tipping site dumpers. The program provides both novice and experienced operators with a comprehensive training package that covers all facets of site dumper operations.

As a highly mobile piece of construction equipment a site dumper provides civil companies with an efficient way of transporting bulk loads around a construction worksite.

If you are looking to achieve a training standard of excellence in preparation for an exciting future career in civil construction Contact our office today:

Course modules:

- **Machine pre and post operational checks**
- **Hazard and risk controls**
- **Operator driving skill development**
- **Hill starts**
- **Loading/unloading procedures**
- **Site dumper stability**

Pre requisites: An understanding of written and spoken English.

On completion of this course participants will be eligible for an operator photo competency card.

## Delivery

- **On the job training** – our trainers come to your workplace to deliver theory and conduct practical skills training and assessments.
- **Live training facility** – courses run at one of our unique training facilities, giving students the opportunity to get hands-on experience in a real working environment.
